INDEX

TO THE

ISSUES OF 1927

OF THE

QUARTERLY JOURNAL.

A.

Acidity, soil, effect of phosphate on— ... ... 199—203
,, ,, ,, potash, phosphate and lime on— ... 38
,, ,, Hopkin's 199
Aeration, soil 153
Air movement 3, 4
Algerian phosphate 11, 13, 15
Analysis of soils and manures ... ... 16—19
,, phosphatic manures ... ... 10—15
Animal meal 40

B.

Bacteria, effect of cultivation on— ... ... 125—126
,, ,, lime on— 127
,, ,, soil conditions on— ... ... 122—124
,, food of— ... ... 124—125
,, nature and habits of— ... ... 119—121
,, types of— 115, 116
Bacteriology, soil, in relation to cultivation and manuring 115—131
Banjhis, effect of plucking on— ... ... 112—114
Barograph 51
Barometer 58, 59
Basic slag 11
Bazaloni plots 32
Belgian phosphate 11, 13, 15
Betjan lime experiment plots 31
Blister blight ... ... 173—178
,, ,, in Surma Valley ... ... 20—24

B.—(*continued.*)

Bone dust 11
Borbhetta Experimental Station ... ... 25—46
Borbhetta Experimental Station, map of— 29
Breaking back, effect of, on crop ... ... 110—112
Brown Blight ... ... 80—84, 183—188
Buffalo cultivation 43, 44, 135
Burma nitrate plots ... ... 33—35

C.

Calcium cyanamide 40
Canker, branch 97, 98
Cercospora Theae 182
Cercosporella 95, 96
Ceylon, Tea Research Institute of— ... ... 94—100
Cheeling 139, 149
Chlorosis 96, 97
Clitoria cajanifolia, to hold up drainsides 36
Copper blight ... ... 178—182
Crop, effect of nitrate of potash on— 38
,, ,, nitrate of soda on— 34, 35
,, ,, potash, phosphate and lime on— ... 31, 38
Cultivation ... ... 133—166
,, effect on bacteria 125, 126
,, experiment plots ... ... 35—27, 133

D.

Darjeeling, map of— ... ... 167—172
,, climate of— 170, 171
,, geology of— 172
Deep hoe 143
Deterioration of soils ... ... 116—118
Dhoolia plots 41

F.

Factory Experiments, methods of conducting ... ... 189—198
Field Experiments, arrangement of plots for— ... 25, 26
,, ,, at Tocklai ... ... 101—114
,, ,, precautions necessary for— 26
Fish manure 40
Forking deep 150
Forking hand 135, 136, 138

G.

Green fly ... ... 61—68
,, ,, climatic conditions affecting ... ... 65—68
,, ,, laval stages of— ... ... 62—65
,, ,, stunting of tea shoots by— 61, 68
Green manure 41, 128
,, ,, inoculation of seeds of— 130
,, ,, influence of bacteria on— 129, 130
,, ,, trenching of— 145, 146
Green tea, analyses of— 91, 92
,, ,, grades of— 90
,, ,, manufacture of— ... ... 87—93
,, ,, polishing of— 90
,, ,, quality and characteristics of— 93
,, ,, rolling and drying of— 89
,, ,, steaming and centrifuging of— 89
,, ,, type of leaf required for— 88
Grey blight ... ... 77—80, 187

H.

Humidity, Relative 9, 194
,, ,, measurement of— ... ... 53—55
Hygrometer, hair 55
,, recording 54
,, wet and dry bulb 53

I.

Indo-China plots 45, 46
Indophos 11, 13

J.

Jungle, suppression of— 153

K.

Kharikatia plots 37
Kankar 145

L.

Lichens on tea stems 76, 77
Lime and bacteria 127, 128
List of recognised analysts 16
Lushai Hill plots 42

M.

Manuring and brown blight ... ... 183—186
,, and cultivation 140
Matelli cultivation plots ... ... 134, 159—162
,, nitrogen plots 40, 41
Mati kalai, effect of phosphate on— 13
Mesai Manipuri plots 40, 42
Meteorological observations, 1926 ... ... 1—9
,, Station at Tocklai 60
Methods of sampling soils and manures 17, 18
Mosses on tea stems 76, 77

N.

Nervox 41
Nitrate content of soil, effect of lime, phosphate and potash on— ... 38
,, ,, ,, effect of tea and jungle on— 39
,, ,, ,, determination of— 39
,, of soda, effect on tea crop 34, 35, 41

O.

Oilcake 41
Organic matter and bacteria 125, 126

P.

Phosphatic manures ... ... 10—15
,, ,, acidity reducing power of— ... 11, 199—203
,, ,, analysis of— ... ... 10—15
,, ,, fineness of division of— ... 14, 15
,, ,, relative efficiency of— 12
pH value of soils 200
Plucking, and fungus disease 187, 188
,, experiments at Tocklai ... ... 101—104
Plutophos 11, 13, 15, 202

Q.

Quality of Tea, experiments on— ... ... 189—198

R.

Radiophos 11, 13, 202, 203
Rahar dal, effect of, on tea 32
Rainfall at Tocklai 3
,, measurement of— 55, 56

R.—(*continued.*)

Raingauge 55
,, automatic 56
Rajghur plots 29, 30
Rim blight ... ... 15, 45, 84—86
Rogamulla ... ... 75—76
Root Rot, violet, observations on— ... ... 69—71
,, ,, soil condition affecting 70
,, ,, treatment of— 71

S.

Shot hole fungus 182
Singhbhum phosphate 11, 15, 13
Singlo cultivation plots ... ... 35, 142, 163—166
Soil, analysis of— 18, 19
,, moisture 8
,, ,, and bacteria 123, 124
,, ,, optimum 8
,, samples ... ... 16—19
,, temperature 7
,, wash 158
Solar radiation ... ... 5, 6, 50—53
Sphaerostilbe repens ... ... 69—71
Stevenson screen 60
Suffry-Lushai plots 32, 33
Sulphate of ammonia 41
Sunshine 4
,, and blight attack 6, 7
,, and plant growth 4, 5
,, recorder 56, 57
Superphosphate 11, 14, 202
Surma Valley, outbreak of blister blight in— ... ... 20—24

T.

Tannin content of green tea 91, 92
Tea green fly ... ... 61—68
Thatch, suppression of— 158
Thermometers ... ... 47—50
,, maximum and minimum, Six's ... 47, 48
,, recording 49
,, soil 50
,, solar and terrestrial radiation 50, 51

T.—(*continued.*)

Tingamira plots 44
,, ,, "rim blight" on— 45
Touring Programme 1928 204
Trenching 144

V.

Violet root rot ... ... 69—71
Vegetable parasites of the tea plant ... 73—86, 173—182

W.

Weather conditions in Assam 1926 ... ... 1—9
,, recording instruments ... ... 47—60
Weeding, clean 139
,, selective 158
Wind, recording instruments ... ... 57—58
,, rose 57
